How Solar Water Heater Works ?

A solar water heater uses glass tube collectors installed on the roof to absorb sunlight.
The heat is stored in a main tank that keeps the water hot throughout the day.

Cold water from a water tower or municipal supply (PDAM) enters the system and passes through a spiral copper coil located inside the tank. This corrosion-resistant copper pipe ensures fast and safe heat transfer, turning cold water into hot water efficiently.

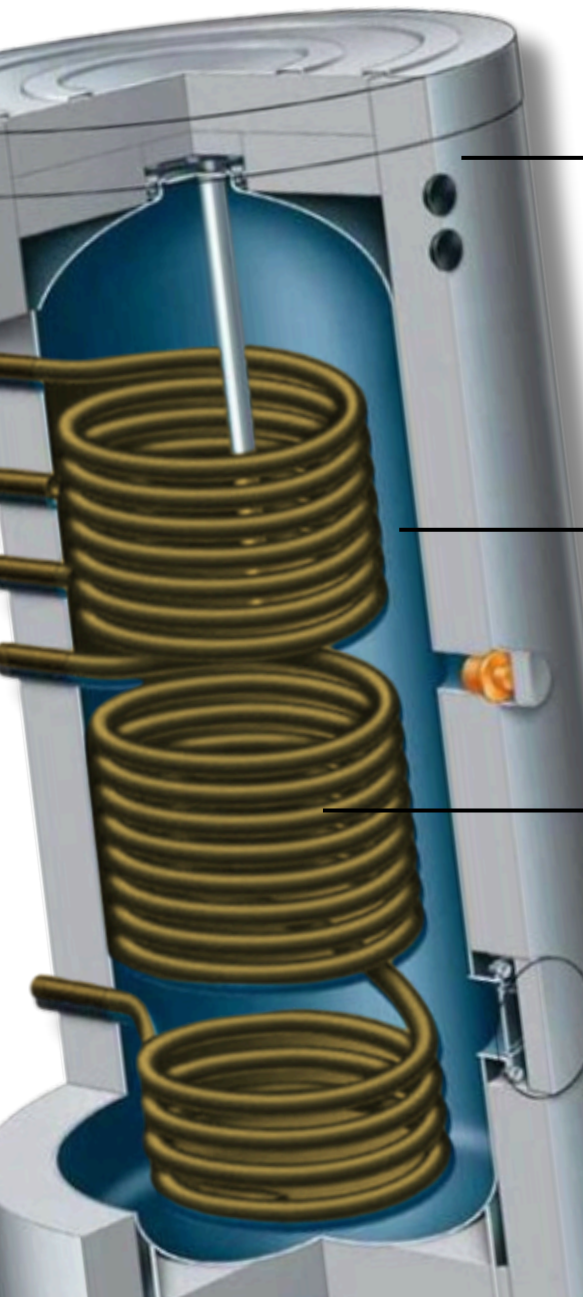

With this system, you get hot water every day — simple, efficient, and eco-friendly.

WARRANTY 8 YEARS

GO GREEN

SAVE ENERGY

SERVICE & SPARE PARTS GUARANTEED

Stainless Steel Tank

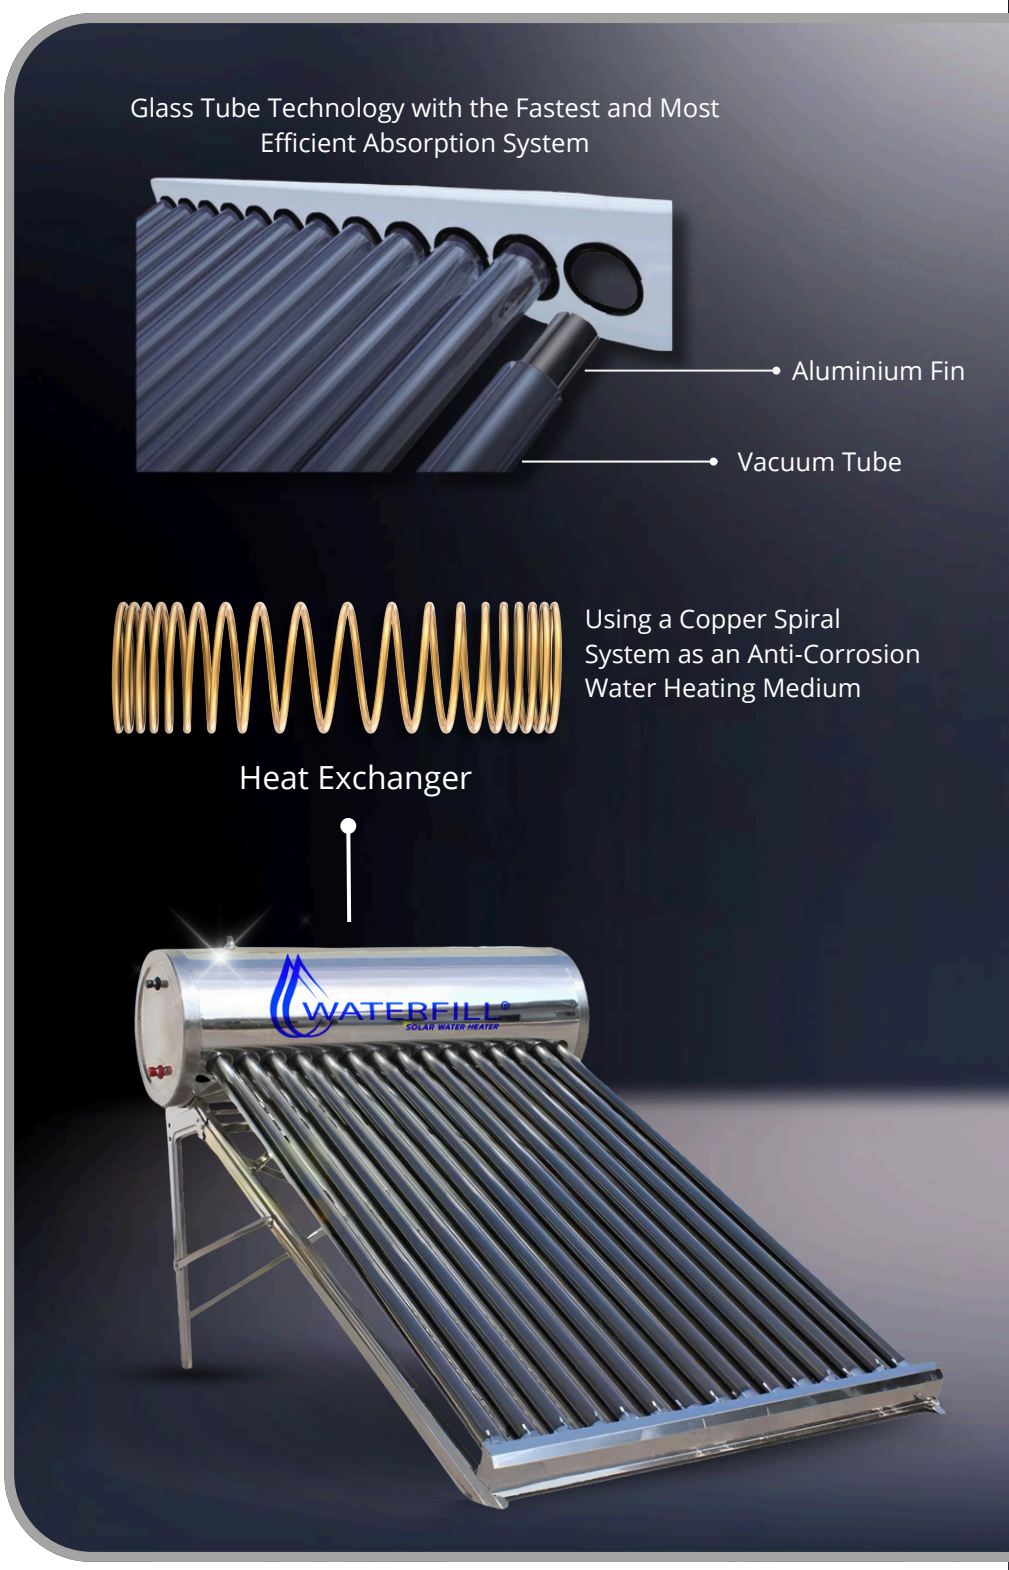

Inner tank is made from high-quality stainless steel SUS 316, with a high molybdenum content for excellent corrosion resistance.

Solar Storage

Water storage tank that has been heated through a glass tube collector.

Heat Exchanger

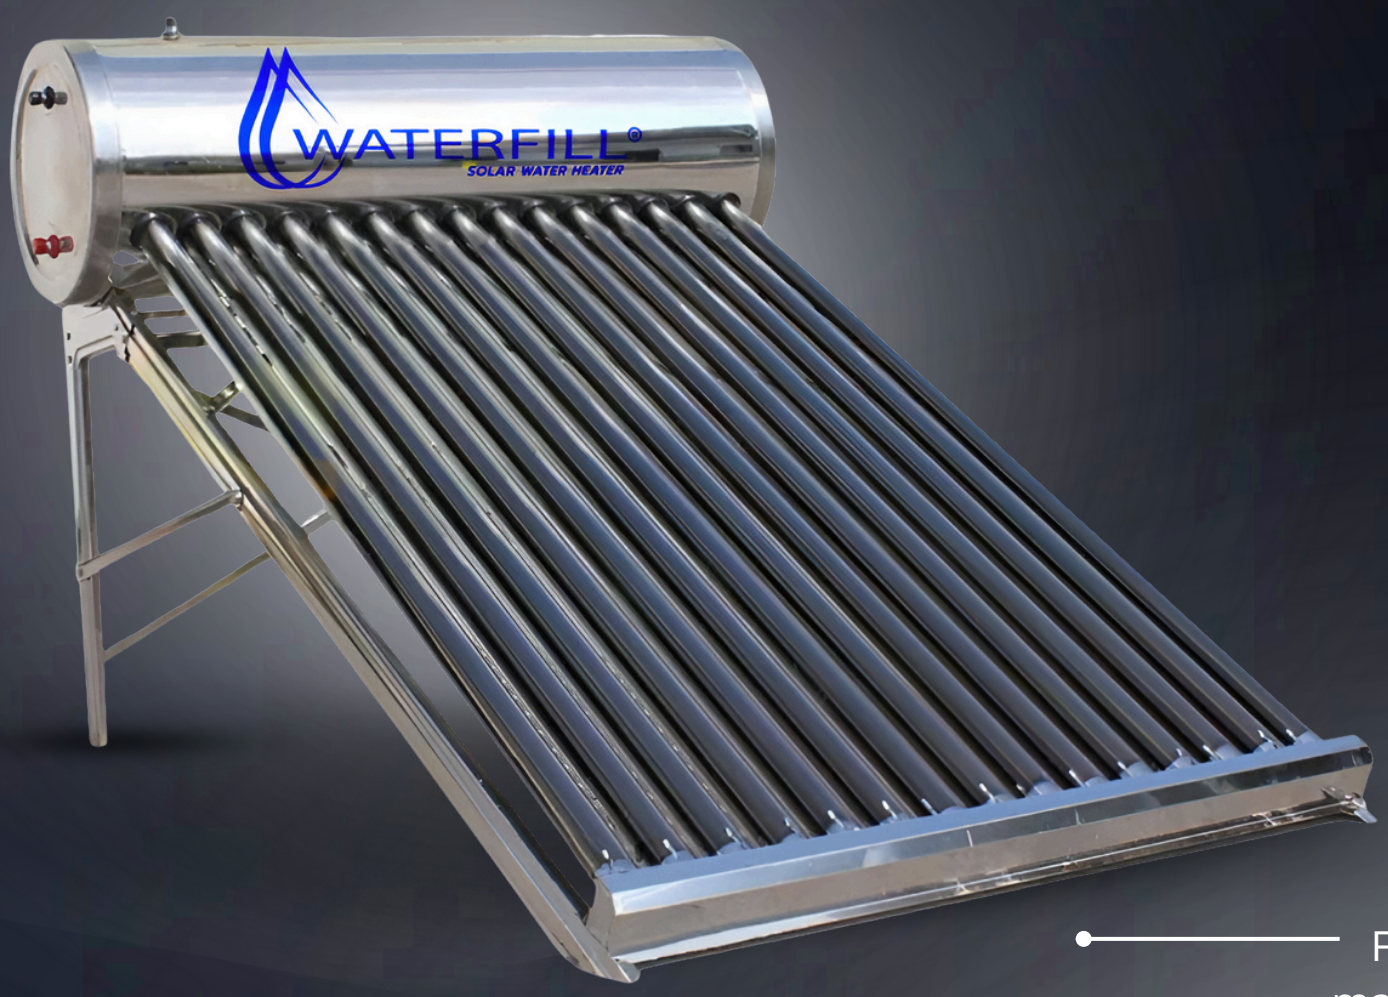

Copper pipes that will be filled with cold water and processed into hot water (smaller heat loss)

WATERFILL®
Advance Water Technology

Indonesia’s leading provider of high-capacity solar water heater

Glass tube technology with a high-speed and efficient heat absorption system

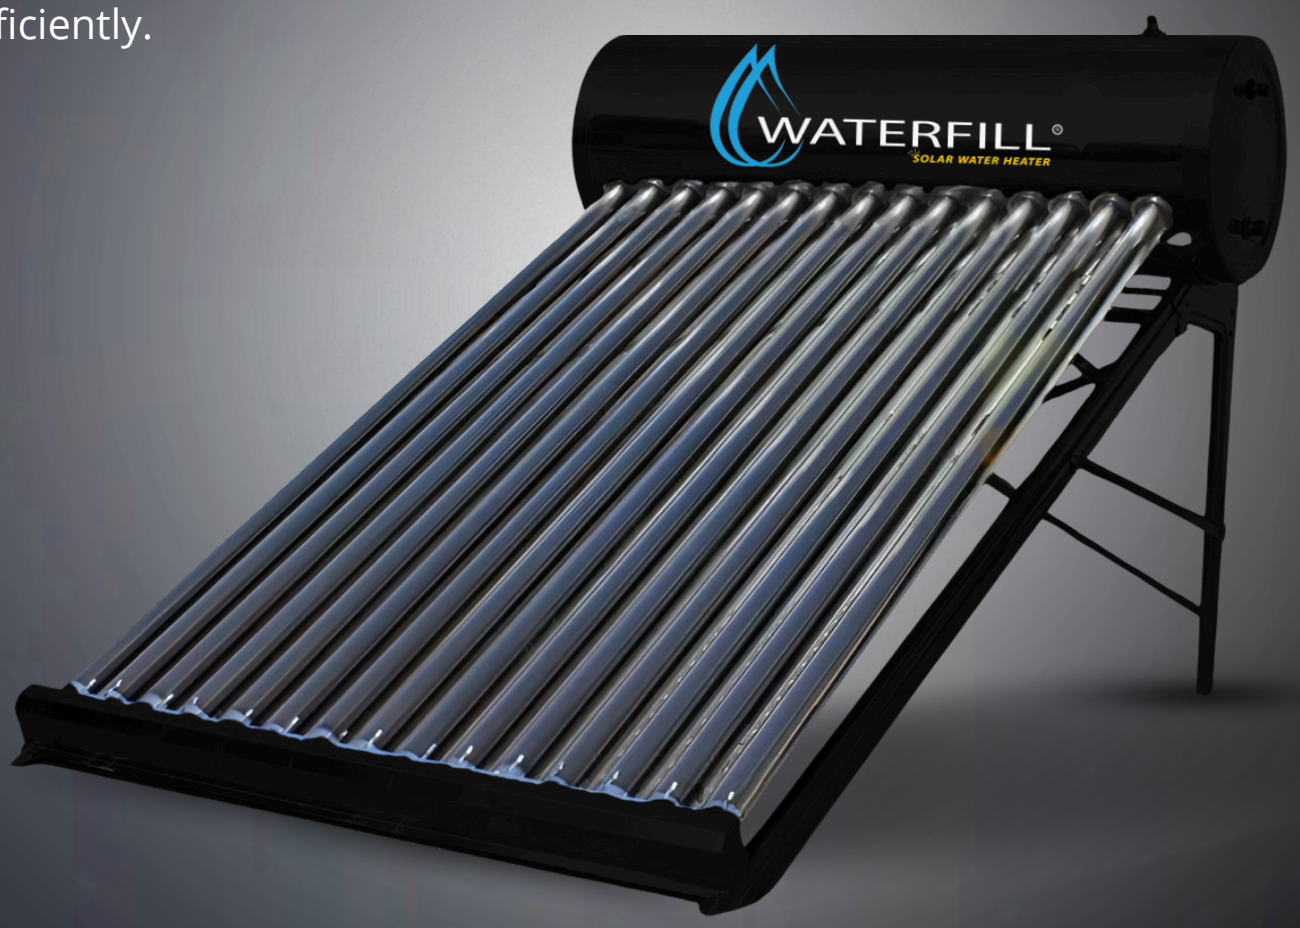

Comes with a Wi-Fi controller for real-time temperature monitoring and remote adjustment via mobile app.

Full stainless steel bracket for maximum strength and durability

Back panel solar heater included. Designed to reflect sunlight from behind, allowing the system to absorb heat faster and more efficiently.

LIFETIME WARRANTY

- Vacuum tubes / solar collectors
- Bracket

GO Green

Save energy up to 99%

POWERFUL

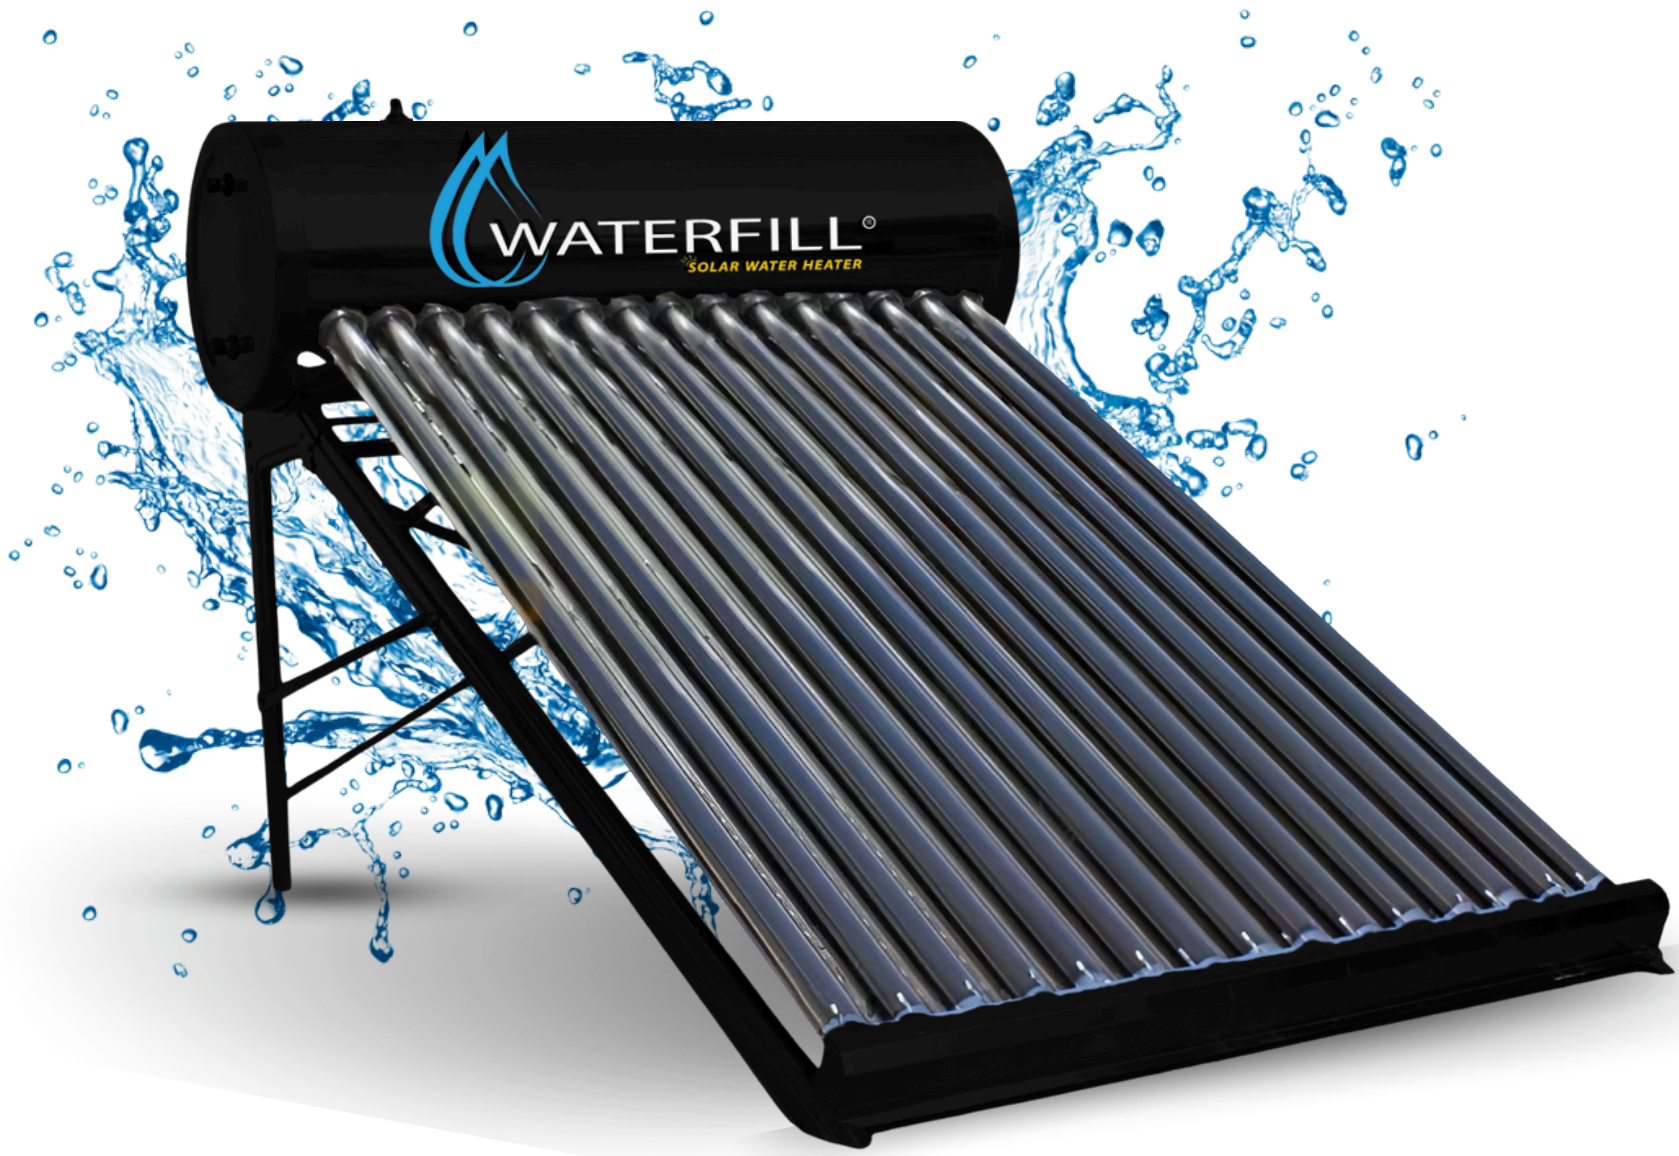

Heat Water Up to 95 Degrees
Capable of supplying hot water to multiple bathrooms simultaneously — no limits.

Black Diamond Series

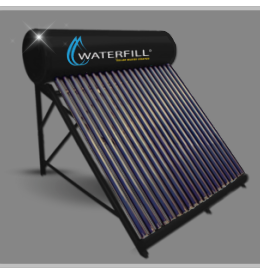

Combines high-performance technology with a stylish, futuristic design

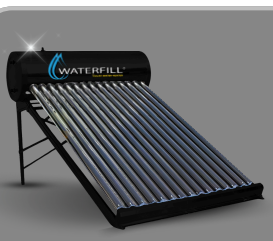

SWH 100 L

Volume : 100 Liter
Dimensi : 48 P x 57 T X 54 T
Berat : 68 Kg
Kapasitas : 2-3 Orang
Material : Stainless Steel 304

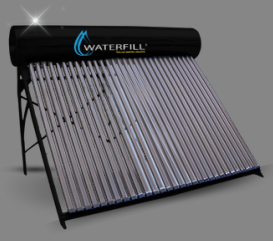

SWH 200 L

Volume : 200 Liter
Dimensi : 164 P x 152 T X 200 T
Berat : 82 Kg
Kapasitas : 4-6 Orang
Material : Stainless Steel 304

SWH 150 L

Volume : 150 Liter
Dimensi : 124 P x 152 T X 200 T
Berat : 68 Kg
Kapasitas : 2-3 Orang
Material : Stainless Steel 304

SWH 300 L

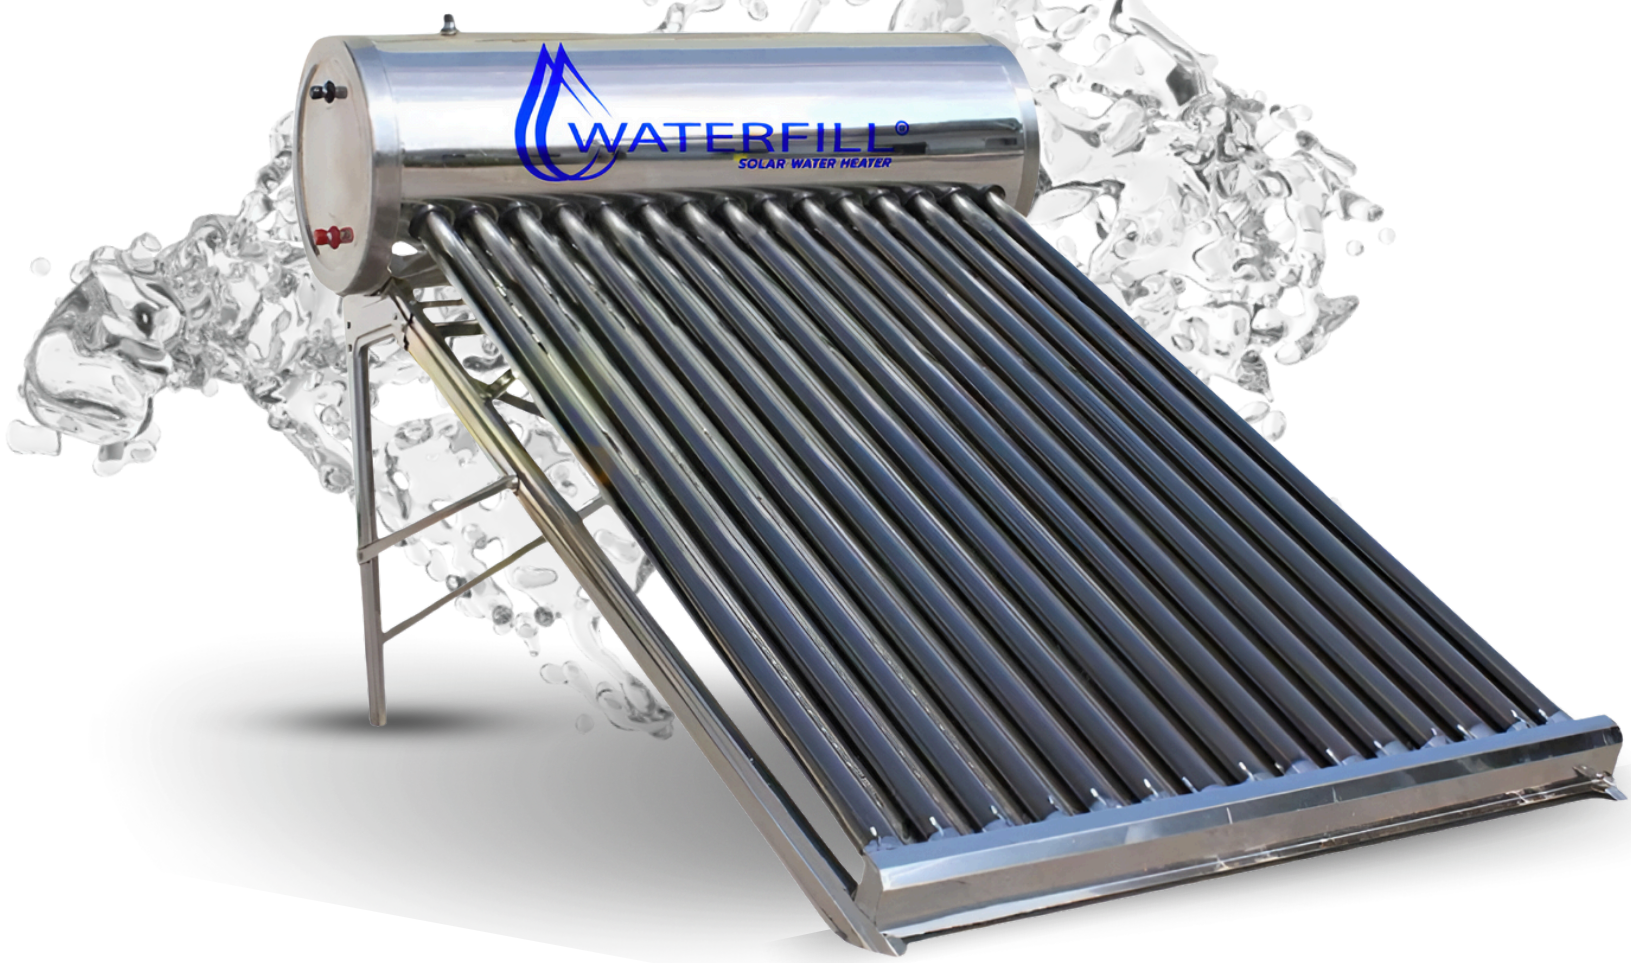

Volume : 300 Liter
Dimensi : 244 P x 152 T X 200 T
Berat : 117 Kg
Kapasitas : 6-8 Orang
Material : Stainless Steel 304

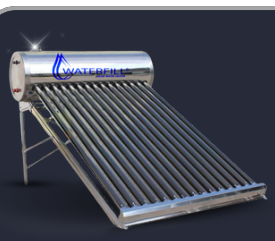

WATERFILL®

Material : Stainless Steel 304

SWH 500 L

Volume : 500 Liter
Dimensi : 410 P x 152 T X 200 T
Berat : 195 Kg
Kapasitas : 8-15 Orang
Material : Stainless Steel 304

Why Waterfill is the Right Choice for Clean Water Solutions ?

Engineered with premium quality, Waterfill filters ensure clean, safe, and healthy water — ideal for both household and commercial use.

Fiberglass Reinforced Plastic (FRP) Material

Fiberglass is a composite material made from glass fibers reinforced with plastic resin

Rust-resistant

Highly resistant to chemicals and seawater

Durable and lightweight material

Designed to withstand high pressure with exceptional strength

Built to last

Built for long-term use and engineered to withstand harsh and extreme weather environments

Why Choose Waterfill ?

- Guaranteed Materials and Product Quality
- Official Warranty and Spare Parts Available
- Using the Latest and Best Filter Technology in Indonesia
- Clean Water Solutions for Your Family/Business
- A Wide Range of Water Filters to Suit Your Needs
- After-Sales Service Always Ready to Assist You

For only IDR 1,800 per day, you can get clean and safe water for your family/business.

Premium Imported Filter Tank & Media Best in Indonesia, with up to 15 Years Warranty

Warranty & Specifications

Reliable warranty and after-sales service, with product specifications customized to meet your requirements.

Manual Lime Filter Head

Automatic Filter Head

Manual Filter Head

WARRANTY 15 YEARS

TYPE : ELITE

- Thickest Tank in Indonesia – No. 1 in Class
- Filter Media with International Standard Quality
- Top-tier Filtration Performance
- 20-Year Tank Warranty
- Media Replacement Lasts Up to 4–6 Years
- Twice Free Service

Color Variants :

HITAM ABU-ABU

WARRANTY 5 YEARS

TYPE : PRIME

- Imported-Quality Filter Media
- 5-Year Tank Warranty
- Media Replacement Lasts 2–3 Years
- Reliable Filtration Performance
- Durable and Trusted Tank Quality

Color Variants :

HITAM ABU-ABU BIRU HIJAU

Effectively removes murky water, odor, iron, lime, and sand content

Water Filter ELITE Series

Waterfill sets a new standard in water filtration systems

Built for strength, made for endurance— Waterfill uses the thickest filter tank in Indonesia with USA-imported media that lasts 5–7 years.

ELITE Series

Effectively removes iron content from water

10 Inch Tube

Capacity	: 6000 L / Day
Diameter	: 26 Cm
Tube Height	: 155 Cm
Inlet Outlet	: 3/4 Inch Pipe

13 Inch Tube

Capacity	: 8000 L / Day
Diameter	: 33 Cm
Tube Height	: 155 Cm
Inlet Outlet	: 3/4 Inch Pipe

ELITE Series

Effectively removes lime (calcium) content from water

10 Inch Tube

Capacity	: 6000 L / Day
Diameter	: 26 Cm
Tube Height	: 155 Cm
Inlet Outlet	: 3/4 Inch Pipe

13 Inch Tube

Capacity	: 8000 L / Day
Diameter	: 33 Cm
Tube Height	: 155 Cm
Inlet Outlet	: 3/4 Inch Pipe

WATERFILL®
Advance Water Technology

Water Filter PRIME Series

Engineered for longevity, Waterfill is the most durable water filter solution for your home or business.

PRIME Series Fe

Effectively removes iron content from water

10 Inch Tube

Capacity	: 6000 L / Day
Diameter	: 26 Cm
Tube Height	: 155 Cm
Inlet Outlet	: 3/4 Inch Pipe

13 Inch Tube

Capacity	: 8000 L / Day
Diameter	: 33 Cm
Tube Height	: 155 Cm
Inlet Outlet	: 3/4 Inch Pipe

PRIME Series Ca

Effectively removes lime (calcium) content from water

10 Inch Tube

Capacity	: 6000 L / Day
Diameter	: 26 Cm
Tube Height	: 155 Cm
Inlet Outlet	: 3/4 Inch Pipe

13 Inch Tube

Capacity	: 8000 L / Day
Diameter	: 33 Cm
Tube Height	: 155 Cm
Inlet Outlet	: 3/4 Inch Pipe
